

RE: AIR1 stations.

Please do not let Air1 be displaced by LPFM, as I fear it will limit our ability to hear the station in my car. This is more than a radio station. This enhances public safety. It is all positive music with no commercials, which really calms the road rage. No joke, during rush hour, this is important stuff. There is nothing offensive, so you don't have to dive for the radio to turn it down. The also have a ministry attached to help people who are having problems. I would not be surprised if the local county crisis lines have decreased their calls because of the work of Air 1. These are really great folks. Their message, and the sincerity with which the message is delivered, truly is supportive of our community at large. This type of programming helps us feel more united, closer together, not just as a local community, but also as a nation. I truly care about the people across country that I hear about on Air1. We need to keep stations like this around. By being nationwide, they are not just serving local communities, but all of our communities nationwide.

Thank you,

Julie Stilwell
